

Technology in English Education

Brianna Sullivan

English Education

There are many ways that technology can be integrated into the process of learning and assessment!

- Posters
- Movies
- Pamphlets
- Handouts
- Web-sites
- Virtual field trips

Colorado State University
School of Education

Poster

Posters can be a great way for students to show what they have learned. It is a great creative activity that students will enjoy. There is an enormous sense of pride when you see your work displayed for everyone to see!

Handout

Handouts are a great way for students to inform their teacher and other students about any given topic. Handouts are great because they can be given to a whole class for everyone to enjoy. Handouts are easy to make and can show a great deal of information.

Website

Web sites are a great way for students to show what they have learned about a topic. They can make one as a whole about a certain topic or slowly add to the website as a class progresses. It is a great way for students to share their knowledge with other students and enjoy themselves by using technology.

Pamphlet

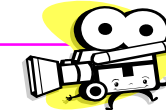

Pamphlets are a great way for students to display a large amount of information in a small area. They can be given to other students too. Pamphlets are very informative and students can be very creative and innovative when they create them.

Virtual Field Trips

Virtual field trips are great for going places you can't usually go. It is a cheap and efficient way for a large group of students to visit a place that will be beneficial to their education. They are a great way for students to be somewhere, without actually being there!

Movie

Movies are also a great way for students to take what they have learned in a unit or researched and turn it into something amazing! A movie can display a wide range of information including pictures, music, and text. Movies can be viewed by the whole class or just the teacher. Movies are fun to make and are a great way to show what you have learned.
